Hiring Team
Professional Engineers Ontario

Dear Hiring Team,

I am writing to apply for the Jr. Help Desk Support position on the Service Excellence Team at Professional Engineers Ontario. I hold a Diploma in Computer Programming from Seneca College, I am CompTIA A+ certified, and I have spent the past year in hands-on IT support and technical roles. I want to be the first point of contact when a colleague's laptop, printer, or account stops working, and to resolve the problem quickly and clearly.

As an IT Support Assistant at Seneca College, I supported more than 50 students a day across labs, classrooms, and the campus help desk. I diagnosed and fixed hardware, software, authentication, Wi-Fi, and printing problems on Windows and Linux machines, restored account access, and escalated complex issues to senior staff with a written update of what I had already tried. Several requests were often open at once, so I learned to prioritize by impact, keep the user informed, and explain technical fixes in plain language. That is the same triage-and-escalate approach your posting describes.

At OpenPolicy, I work on a production platform used by compliance, public-affairs, and strategy teams. Over this internship I have shipped more than 10 features, including workflows that track 100+ legislative items and send automated alerts. When something breaks, I reproduce it, document the failure, and review the fix with my team on a weekly release cycle. I bring that habit of careful documentation to the how-to guides, procedures, and equipment records this role requires, and I am comfortable researching unfamiliar problems until I find a reliable answer.

I am familiar with Windows 10/11, Microsoft 365 (Teams, Outlook, OneDrive, SharePoint), network printers, and Wi-Fi and TCP/IP fundamentals, and I am keen to build on that with Active Directory, Group Policy, and mobile device support. PEO's mission to protect the public interest, and its focus on service excellence, are what draw me to this role. I would welcome the chance to support your staff, to help with onboarding, endpoint updates, and inventory, and to work with the hybrid schedule. Thank you for your time and consideration. I look forward to speaking with you.

Sincerely,

Aashrawat Shrestha
